

# Jingkang Zhang

CS major at UC Berkeley (Class of. 2022)

## Education

2018-06 -  
present

### University of California, Berkeley

BA, Computer Science  
3.9 GPA

2017-06 -  
2017-08

### Stanford University

Summer Session student, Silicon Valley Innovation Academy, Computer Science Intensive Certificate  
4.0 GPA

## Work Experience

2018-08 -  
present

### Academic Intern

Berkeley CS61A  
Academic intern in CS61A at UC Berkeley, helping students during Labs and Office Hours. Three hours of time commitment each week.

## Projects

2018-06 -  
present

### Teaching Python3 Online (Volunteer)

- Instructor
- On-going for 3 continuous terms. The Spring 2019 class boasts ~58 students whose ages span from 15 - 46.
  - Developed 2 coding projects: GameOfLife and SlidingPuzzle for the class, each with Easy, Medium, and Hard versions. Available on [my Github](#).
  - Lecture materials (recordings, notes, homework) available here: <https://1drv.ms/f/s!Av1UNHigdF5ThQTXPRdhQk3rb0qQ>
  - I lead a staff team of 6.

2018-06 -  
present

### auto-auto-grader (autoAG)

Educational project  
Web app built for CS educators. Developed in the process of teaching Python. Automatically generates homework templates and autograders, simplifying composing coding homework and test cases. Created with ReactJS and Python. Link: [jingkangzhang.github.io/autoAG](http://jingkangzhang.github.io/autoAG)

2016-10 -  
present

### CollegeFork.com

Cofounder, CTO  
CTO at [www.collegefork.com](http://www.collegefork.com), a US university information website. Created with HTML, CSS, JavaScript, and CanvasJS.  
Notable Page: <https://collegefork.com/match/filter.html>

## Personal Info

### Address

2700 Hearst Ave. 7A50B  
Berkeley, California, USA

### Phone

(510)345-7475

### E-mail

[zjk@berkeley.edu](mailto:zjk@berkeley.edu)

### GitHub

<https://github.com/JingkangZhang>

## Skills

Python

ReactJS, JavaScript

Bootstrap, CSS

Java

C

SQL

Git

RISC-V

RegEx

Scheme

## Courses

Data Structures

Programming Abstractions

Client-side Internet Technologies

Structure and Interpretation of  
Computer Programs

Machine Architecture

Discrete Math and Probability Theory

Efficient Algorithms and Intractable  
Problems

Intro to Artificial Intelligence
